Summary

Software Engineer with over two years of professional experience, mainly focused on backend development and software design. Passionate about building applications from the ground up, with a strong interest in system architecture and designing scalable and maintainable solutions. I hold a bachelor's degree in computer engineering, and I am currently completing a master's degree in the same field, which provides a solid technical foundation that I apply in my professional work. I have experience in both product companies and technology consulting environments, working for end clients in agile and collaborative teams. I enjoy solving complex engineering problems and contributing to high-quality software solutions within team-oriented environments.

Technical Skills

Java, Spring Boot, SQL, Microservices, Kafka, CI/CD, Jenkins, etc.

Professional Experience

Java Backend Engineer Deloitte - Galicia, Spain

July 2025 — Current

Backend development for a healthcare and social services platform focused on multi-channel care and monitoring of individuals. Built scalable and secure services using Java 21, Spring Boot, Spring Security, and MuleSoft, applying parallel processing to improve performance. Implemented authentication and authorization with Keycloak, managed data in Oracle Database, and integrated event-driven communication using Apache Kafka. Ensured code quality with SonarQube and monitored performance through AWS CloudWatch and Jenkins pipelines, working in a Hybrid Agile (Scrum-based) environment with iterative delivery and continuous improvement.

Software Engineer GBTEC Group - Galicia, Spain

February 2024 — May 2025

Backend development with Spring Boot, Spring Data, Spring Cloud, and Spring Security, building scalable applications and implementing testing strategies with JUnit, Testcontainers, and Mockito while maintaining code quality through SonarCloud. Worked on prompt engineering solutions with OpenAI to improve response accuracy and functionality.

Frontend development with Angular for internal tools, creating reusable components and optimizing application performance. Worked collaboratively using Git and GitHub in an agile environment following Kanban methodology.

Education

Master's degree in computer engineering – National University of Distance Education; Spain (in progress, expected graduation: Feb 2027)

Bachelor's degree in computer engineering – University of A Coruña; Galicia, Spain

- University of Bergen, Norway (one semester)
- University of Maribor, Slovenia (one semester)

Languages

Spanish – Native

Galician – Native

English – Fluent (C1)
